

7枚のせんべいをコップの中にきちんと収まるように詰めて遊ぶパズル。

Arrange the seven rice crackers so that they fill the glass below the mouth.

まず、7枚のせんべいを写真と同じように並べます。(特に、せんべいのウラ表に注意しよう。)

First of all, identify the seven crackers as shown in the photos and arrange them in numerical order. (Note that the patterns on the two sides are different.)

次に、①のせんべいを一番下に置き、②、③……⑦と重ねます。

そして、天地逆さまに持ちかえます。

Put cracker 2 on top of cracker 1 so that the concave and convex contours match. Continue piling up the remaining seven crackers in the same way: 3 on top of 2, 4 on top of 3, etc.

最後に、コップをかぶせて、逆さまにすると完成です。

Finally, put the glass jar over the crackers so that they are all inside the jar. Turn the jar over with all the crackers inside and the puzzle is finished.

NOTE

Cracker 7 will actually be on the bottom and cracker 1 at the top.

〈ワンポイント・アドバイス〉 せんべいを重ねるときは、手のひらの上でそれぞれのそりを合わせるように回してみるのがコツだよ。(コップの中で作るのは難しい)

Advice: The best way to do this puzzle is to pile up the crackers in the palm of your hand and rotate them until the contours fit neatly together.

It's difficult to pile the crackers up inside the glass because it's hard to get the contour to match.
